Our Student Portfolios will demonstrate your child’s learning in Literacy, Numeracy, Integrated Studies and other important areas of the curriculum. You can expect to see examples of their work that is complemented by teacher observations and self-reflections. It is our aim to provide you with concrete examples of growth in learning, focused comments on achievements against specific learning intentions and insights into “where to next”.

Importantly, your child will be supported to reflect on their learning, identifying their accomplishments and looking to see what they seed to concentrate on for further development.

You are also invited to contribute your insights and encouragements to your child in the portfolios.
